Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner informed Ms. Kornbau that the after-final amendment and arguments filed 8/30/01 had been fully considered. The amendment will not be entered as it introduces new 112, 2nd paragraph issues, specifically with regard to adding an "inhibitory agent containing at least 20 w/w% trehalose to said inhibitory agent", as recited in the last few lines of claim 5. The exmr stated that this portion of the claim now seemed to be nonsensical. The exmr also stated that the proposed amendment will overcome the claim objection and said that arguments with regard to the new matter rejection were convincing. However, the arguments with regard to the rejections made under 35 USC 103 were not fully convincing, therefore these rejections are maintained. The examiner recommended that in applicants consider rewriting claim 5 in a possible future amendment to improve claim construction and clarify the intended limitations.
